

# CHEMISTRY (BS) - SECONDARY EDUCATION

---

## Overview

The Chemistry and Secondary Education degree track is offered in collaboration with the College of Education and Health Professions. This track is designed for students with an interest in teaching chemistry at the secondary level or pursuing graduate studies in chemical or science education. In addition to the general degree requirements, the track requires satisfactory completion of courses in chemistry, mathematics, physics, and education. The education components of the track are offered through an innovative teacher preparation program (UTeach Columbus (<http://uteach.columbusstate.edu/>)). A broad range of upper-level elective courses in chemistry exists to expose students to modern fields within the chemical sciences and to help students broaden their understanding of science education.

All educator preparation programs are approved by the Georgia Professional Standards Commission. In addition to the degree requirements, there are further requirements for teaching certification. Visit the Certification page (<https://cctl.columbusstate.edu/certification.php>) on the CSU Center for Quality Teaching and Learning (CCTL) website for detailed information about certification requirements and the certification process.
